Prof. Dr. Mehmet Haberal
Founding President of Başkent University
9th President of Turkish Republic, Süleyman DEMİREL
Graduation Ceremony
It was May 4, 1993. Together with my mentor Professor İhsan Doğramacı, we went to the Gülhane Military Medical Academy Hospital to accompany Minister İsmet Sezgin during his surgery. The operation went on smoothly, without any complications. Afterwards, Professor Doğramacı and I started talking about current health issues in the country and possible solutions when suddenly he

Professor Mehmet Haberal describes how Başkent University received its name

“THEN, IT IS BAŞKENT”

İsmet Sezgin, the Minister of Internal Affairs at the time, had been diagnosed with a kidney stone and scheduled for surgery at the Gülhane Military Medical Academy Hospital.
said: “Why don’t you establish a new university?” His comment caught me by surprise. The idea of establishing a new university had been on my mind for a long time, and I had started working on the project. I told Professor Doğramacı that the paper work had almost been done and completed; I was ready to submit the file for application. As we were walking to his car, he said: “Let’s go to my office.”

As a surgeon, as a man of science, and as a citizen of the Turkish Republic, it is my primary duty to express my gratitude to Professor Doğramacı and honour the memory of this great man, not only because, by establishing Hacettepe University back in 1967, he had accomplished a significant breakthrough in the field of medicine in Turkey and, by establishing Bilkent University in 1986, led the path for the foundation universities in the country, but also because he gave Başkent University its name and, more importantly, contributed greatly to the recognition of our country in international platforms.

We went to Professor Doğramacı’s office in the Bilkent University Library. He immediately summoned the University’s legal adviser and asked her to prepare the documents needed for the establishment of a foundation university. Then he turned to me and asked another question: “What is the name going to be?” When I told him that I hadn’t thought of a name yet, he suggested the name “Haberal”. I remember responding to it without hesitation: “Sir, why doesn’t Bilkent University bear the name ‘Doğramacı’?” Without waiting for his answer, I added: “Whatever name you see fit will be the name of my university.” Professor Doğramacı thought for a while and then said: “Then, it is ‘Başkent’.”

“Sir, I would like you to name my new university,” I said to Professor Doğramacı.

That was the very day Başkent University got its name.

Mehmet A. Haberal, MD, FACS
Founding President of Başkent University

19.11.2010
Time: 22:40, Room Number: 304
The journey which led us to the establishment of Başkent University, had started with the Turkish Transplant and Burns Treatment Foundation established in 1980, and continued with the first dialysis center coming into operation on March 12, 1982. After the foundation of the first hospital on September 16, 1985, we launched Başkent University in 1994, for the purposes of educating individuals who stand bound to Atatürk’s principles, embrace science as their guide, have a national consciousness, possess an inquisitive, productive, analyzing and integrative frame of mind, are creative and innovative, and respect human rights and nature. Perseverance, self-sacrifice and confidence have enabled us to make an impressive progress in a short period of time. Başkent University provides services through its employees and facilities according to “The week is 7 days, a day is 24 hours” principle with an aim to offer a high quality service.

Currently, Başkent University consists of various faculties and schools, namely Faculty of Medicine, Faculty of Commercial Sciences, Faculty of Communications, Faculty of Dentistry, Faculty of Economics and Administrative Sciences, Faculty of Education, Faculty of Engineering, Faculty of Fine Arts, Design and Architecture, Faculty of Health Sciences, Faculty of Law, Faculty of Science and Letters, a state conservatoire, seven institutes, six vocational high schools and two private high schools. The university also boasts hotels for practical training, a TV channel as well as a radio channel that has a capacity to broadcast globally, an academic orchestra, various health institutions and organizations throughout Turkey that provide, after the Ministry of Health, largest patient services in the country.

The University welcomes the students with a lively life on the campus, where the construction of the buildings began in 1995 and which has become more dynamic with other facilities added since then. Başkent University’s technological infrastructure, high tech medical equipments, and dynamic and fully qualified academic staff have made the University a more successful higher education institution. All of our university’s resources are being used to their fullest capacity in finding ways to help improve the problem areas of our country, which are health, education and communication.

I would, on behalf of the Başkent University family, like to welcome you who have chosen to partake in this team and wish you good luck with your studies as well as new cultural experiences.

Mehmet A. HABERAL MD, FACS
*Founding and First President*
In order to fulfill the need for well-qualified universities in our country, our founding president Prof. Dr. Mehmet Haberal established Başkent University by combining 30 years of hard work and devotion with a great vision. By founding Başkent University, Prof. Dr. Mehmet Haberal who is at the pinnacle of achievement among the elite cadre of general surgeons in the world, has launched a great system for the purpose of serving his country and his nation.

Our students are able to learn more than one foreign language, take art lessons and improve their self-esteem through “student based practices”. Moreover they have the privilege to receive education from nearly 1500 institutions that have the highest number of international publication capacity. Besides providing opportunities for attaining a double major or an additional minor degree, Başkent University has entered into collaborative projects and exchange programs with many universities abroad in order to enhance the enrichment and quality of teaching and research programmes. Başkent University is the first university in Turkey, which has been certified by an International Organization for Standardization –ISO-documentation.

Başkent University has 9000 employees and nearly 10,000 students. It also has many distinctive features and significant areas of competence that differentiate it from other higher education institutions. As stated by our founding President, one of the most important features of our university is its policy of foreign language learning. Although our university’s language of instruction is Turkish, English is a mandatory part of the curricula. Our aim is to equip our students with a high command of English needed in their future professions. All services, except banking and transportation, are being provided and owned by the university.

As a leading university, Başkent is committed to continuous quality improvement and also contribute to the improvement of technological, socio-economic and cultural aspects of Turkish society. As the academic staff, employees and students of the “Başkent Family”, we are inspired by Professor Mehmet Haberal’s great vision of becoming an internationally recognized university which has a high level of competition capacity, and carry on our activities by preserving and improving our high standards of learning and success.

BAŞKENT UNIVERSITY
STATE CONSERVATORY
Turkish Music Concerts
The Music section, with the support of our founding President Prof. Mehmet Haberal, was founded as a department of Music within the Faculty of Fine Arts in 2003 and in order to further its activities it became a State Conservatory in 2006.

Başkent University State Conservatory has two departments: The Department of Stage Arts and The Department of Music. The aim of the education is to train composers-theorists and performer artists. Department of Music students receive education in the fields of composition, theory of music and performing under the supervision of fulltime Inst.s and artists of Turkey who work in important art organizations. Our students are eligible to work in art organizations as performers after the completion of their studies in license and master degree programs.
on performing. Theory and composition students carry on their studies in composing and are eligible to work as theorist Inst.s in music schools.

Stage Arts Department offers programs in the fields of Opera and Popular Music Singing. These students get a chance to study with important performers of Turkey and following their graduation, can work as performers in professional art organizations as well. Successful students are given the opportunity to go to European countries to study through student exchange programmes.

Our education programme also includes Certificate Programs together with License and Master Degrees. People from all ages get the chance to study Music Theory and Performance within our facilities. These certificate programs do not only serve people who take music as a hobby but also those who want to study music to become a musician as well.

Another important body under the conservatory is the Orchestra Academic Baskent which is Ankara’s first professional string chamber orchestra. Orchestra Academic Baskent as a very successful orchestra, performs both in Turkey and abroad and hosts distinguished artists as soloists and conductors from all over the World.

FACULTY OF DENTISTRY
Baskent University Faculty of Dentistry was founded in 1999. The faculty has been administering post-graduate education and clinical service from that year on. Undergraduate education has started with a 30 student quota in 2006.

Dental education is comprised of a 5 years education program, where the first 3 years consists of pre-clinical courses which are followed by 2 years of clinical training. Preclinical courses involves basic medical sciences and dental courses. The language of education is Turkish. As a part of individual training at preclinical level, all students are trained on patient simulators under the supervision of faculty members. Each student has the chance to follow the practical demonstrations from monitors placed before them. In addition to the theoretical courses, 4th
and 5th year students are trained in Prosthodontics, Periodontology, Pedodontics, Orthodontics, Restorative Dentistry, Endodontics, Oral and Maxillofacial Radiology and Oral and Maxillofacial Surgery clinics again under the supervision of faculty members. Currently, there are ongoing 4 years PhD programs for postgraduate education in all departments of the faculty. The first two years of the PhD programs consist of both theoretical and clinical courses and the final two years consist of the students’ thesis and clinical practice. The students find the opportunity for research and are able to use the animal and research laboratory of the university.

Prof. Dr. Mehmet HABERAL, the founding president of Başkent University, who brought in several institutions to Turkey by inspiring and enlightening the country at the universal level in the areas of science, education and services, founded the first Faculty of Education among Turkish foundation universities in 2000 trusting that education is in the key position in paving Turkey’s way to advancement in the twenty first century. Our faculty inaugurated in the academic year of 2000-2001.

Our faculty consists of seven departments and nine undergraduate programs which are: Department of Elementary Education Early Childhood Education Program, Primary Education Program, Elementary Mathematics Education Program; Department of Foreign Language Education English Language Education Program; Department of Turkish Language Education Turkish Language Education Program; Department of Computer Education and Instructional Technology Computer Education and Instructional Technology Program; Department of Secondary Education Science and Mathematics Education Secondary Mathematic Education Program; Department of Secondary Education of Social Fields Teaching Turkish Language and Literature Education Program; Department of Educational Sciences Guidance and Psychological Counseling Program.

Our Faculty proved its place in a very short time among the pioneering institutions in the country with the achievements put in practice, solutions provided for educational problems, ongoing projects and graduates. Our principal philosophy is, to create an integrative structure in education to establish an educational system that will improve the culture of life and economics, create awareness, carry our society to universal values through uniting it with its own cultural repertory and pave the way for authentic breakthroughs in the way Great Leader Atatürk has pointed.

In this respect, to improve our education system, our faculty always takes part within national and international scientific studies, organizations, and projects, keeps track of novelties and advancements, carries out research constantly, transmits its achievements to students, corporations and to the society, and makes use of the results it gets for institutional development. These processes make up the very chief characteristic feature and difference of our faculty among other faculties.

Although the medium of instruction in our faculty is Turkish, our students graduate with a salient level of foreign language competency. After a year of preparatory education at the Department of Basic English, students are offered vocational English courses within the undergraduate programs. Students also have the opportunity to learn several different foreign languages in university’s Centre for Language Studies.
In order to ensure the integration of technology into education and to develop and make the applications of distance education and e-learning prevalent, a fully equipped Instructional Technologies Application and Development Laboratory is operating in our faculty. Besides, there exist computer laboratories that students use actively, technology classrooms, a science classroom, an arts workshop, and a music and performative arts room are all used efficiently.

Başkent University Faculty of Education trains prospective teachers who attach high importance to doing research and improving the self upon a solid vision and who acquire scientific manners and abilities at the universal level. Graduates of our faculty take responsibility on the education processes in the society and the environment they live in. Our graduates have a deep repertory of arts, literature, and culture and they have a high opinion of national values and culture and of Turkish language which is the highest symbol of Turkish Republic’s achievements and unity.

Başkent University Faculty of Education takes great pleasure in educating twenty first century’s creative teachers, in carrying out scientific research regarding the problems Turkey face in the field of education, and in coming up with solutions based on comprehensive research.

FACULTY OF SCIENCE AND LETTERS
Prof. Dr. Mehmet Haberal
Bağlıca Campus 2007
Established in 1994, the Faculty of Science and Letters consists of four departments: the Department of American Culture and Literature, the Department of Turkish Language and Literature, the Department of Statistics and Computer Sciences and the Department of Psychology. The Department of Psychology, recently established, will start its undergraduate programme as soon as official procedures are completed.

The Faculty of Science and Letters has two computer laboratories and one visual laboratory, all of which are equipped with high speed internet and modern technology. All of the computers at the Faculty are supported by a high speed Local Area Network connection, and users have access to national and international databases.

With our fully-qualified academic staff, we aim to train self-confident, outgoing and creative individuals whose professional vision incorporates independent and critical thinking, and who produce and use knowledge competently and innovatively, utilize information technologies, area-specific concepts, theories, and terminology, and carry out their responsibilities for society efficiently and successfully.

The curricula of our departments, including both compulsory and elective courses, are in line with international accreditation agencies and are updated regularly to keep up with new academic developments. In order to be actively involved in academic innovations, our Faculty attaches great importance to its contacts with several outstanding universities, both at home and abroad.

Students are encouraged to learn foreign languages and to keep up with new developments in information technologies. They also have the opportunity to take elective courses from other departments.

Students have the opportunity to spend an academic year at a European university by applying to the ERASMUS Student Exchange programme. In addition to this, volunteer students can take part in national and international projects conducted by our departments in order to obtain experience in their chosen fields.

Among the academic activities organized by our departments are student seminars, national and international student conferences, research paper contests, lectures by guest speakers, discussions based on film presentation, drama, and various other social and cultural activities.
As individuals who are committed to the Republic of Turkey and the Turkish nation as well as to Atatürk’s principles and reforms, who are conscious of their rights and responsibilities as citizens, and who aim to preserve the material, spiritual, and cultural values of their country, our graduates have always qualified for successful careers in prestigious institutions.

Graduation Ceremony
FACULTY OF FINE ARTS,
DESIGN AND ARCHITECTURE
Baskent University Faculty of Fine Arts, Design and Architecture is an educational institution which was founded to bring a new perspective to cultural and artistry movements and to provide the world of design with unique inventions.

Our faculty has its basis on our great leader Atatürk’s well-known words: “Culture is the fundamental component of Turkish Republic.” Our philosophy is to unify our cultural background with modern and universal art, to carry out research in pursuit of new findings in the field and to put forward novice designs that come out as a combination of technology and art.

Department of Visual Arts and Design, Graphic Design Program

The aim of the Graphic Design Licence Program; is to educate creative individuals who can express the feelings visually on printed or digital media by using graphics and images. While the Program is giving basic and improved technical, technological and critical thinking strategies, which will be useful in graphic design, to the students, it also provides students to have an ethic, social and environmental point of view. The program encourages students to develop ideas in the imagination, sensitivity and research periods individually and also by cooperation.

Department of Interior Architecture and Environmental Design

The 4-year undergraduate degree program structures itself around contemporary approaches related with the aspects of function, aesthetic, technology, production, organization, and management. The outstanding difference of the under-graduate program is: to discuss Interior Architecture and Environmental Design around contemporary phenomenas- like function, aesthetic, technique, technology, economic, production, organization- and to carry these discussions to the artistic and scientific outcomes and to stimulate critical and creational way of thinking in order to develop contemporary artistic and scientific methods; and to practice these methods in future-oriented designs, and also in conservationist designs to preserve and re-use our cultural and architectural heritage.

Faculty of Fine Arts, Design and Architecture
Student Exhibition
FACULTY OF LAW

The Court Hall
Başkent University Faculty of Law was opened in 1997-1998 academic year. Although there is a great demand in Turkey for law schools, in order to promote excellence in education and attract students of high quality, enrollment is limited to 150 students. Twenty-five of these students will receive scholarships through the Student Placement Exam.

The medium of instruction is Turkish; however, to operate in the field of international law, students must have mastered English. Therefore, if their English is not satisfactory upon admission, they will attend the School of English Language. The legal curriculum includes additional English language courses so that students may expand their professional vocabulary.
in four academic years. As modern education in law entails knowledge of economics, management, accounting and international law, electives will also be available in these areas. Our Faculty is the first faculty in Turkey, which includes a “moot court” where students will debate topics of interest.

As in all educational programs, the quality of the teaching staff is of primary importance. Our faculty includes Inst.s widely recognized in the field of law.

Under these circumstances, our faculty aims to give a high level of law education with the knowledge of at least one foreign language, broad culture, good computer skills and the ability of using economic and international law knowledge when necessary.

Citizens of Ankara whose age are over thirty are very well aware of the stony, treeless and sandy environment of Bağlıca Campus. Prof. Dr. Mehmet Haberal, our founding President, once in a while used to regurgitate troubles and difficulties encountered while vitalizing the barren land. However, he used to share out with great pleasure the created work during the graduation ceremony called “render account” days.

Because the Faculty of Economics and Administrative Sciences is one of the early establishments of Bağlıca Campus, special attention is given then.

With its educational programs and curriculum and also with the emphasis placed on foreign language, our Faculty served as a “source of inspiration” to the other faculties that were established later.

The Faculty that started enrollment in 1995 now has five departments, namely: Management, Economics, Political Science and International Relations, Tourism Management, Technology and Knowledge Management.

The medium of instruction is in Turkish. However, it is one of our prime objectives to teach our students a foreign language since our establishment. By offering
Professional English courses that are available in our curriculum and by using course materials in English, we ensure our graduates to have good command of English. Although the date of our first graduates is quite recent, they are among the top rank in Civil Servants Language Exam.

The main objective of our Faculty is to prepare students for the global community of the future by equipping them with qualitative and quantitative techniques. There is no doubt Turkey will have a great need to those young people who are faithful to the principles and revolutions of Atatürk.

Our Faculty also makes important contributions to postgraduate education by taking part in the design and implementation of master and doctorate programs that are successfully carried on within the University.

Our students have the option to continue their education in foreign universities based on the prevailing agreements. Thus they are enabled to fit the global environment and make acquaintance with other cultures.

FACULTY OF COMMUNICATION
As communication industries have rapidly developed in recent years, the need to process and evaluate information has become more important than ever. New disciplines, approaches, scientific methods, and techniques need to be formulated and applied to the social, political, and cultural realities of contemporary Turkey, in order to create high standards in communication education. This is our aim in the Faculty of Communication, founded in the 1998-1999 academic year. Consequently, we have...
Founding President Prof. Dr. Mehmet HABERAL
When Sewing the Tree
established an academic staff that are competent, dynamic, and experienced in their fields. The Faculty has three departments: Department of Public Relations, Department of Communication Design, and Department of Radio Television and Cinema.

FACULTY OF ENGINEERING
The primary goal of the education and research activities of the Engineering Faculty is to graduate our students as productive, analytic, and inductive individuals. We strive for educating our students as creative and innovative engineers, who are capable of embracing the place and importance of engineering in human life, environment, and technology with complete respect to human mind. Furthermore, our programs focus on developing characters with the motivation and ability to question, investigate, and research. Based on the fundamental principle of Baştent University; “Science accumulates here and disseminates from here,” our objective is to contribute to the elevation of the technological, socio-economical, and cultural level of the society, to improve human health, and to spread social services by means of training-education, research, development, and scientific dissemination activities.

Education at the Faculty started with the Department of Electrical and Electronics Engineering in the 1996-97 academic year and kept expanding with the opening of Computer Engineering and Industrial Engineering Departments in 1998-99 and 1998-99 academic years, respectively. Our Faculty, which continually bases its development on rational principles, launched Turkey’s first Biomedical Engineering Department in the 2000-01 academic year, with the foresighted proposal of Prof. Dr. Mehmet Haberal, the founder and the founding president of Baştent University. Finally, the Department of Mechanical Engineering was opened in the 2003-04 academic year.

As a requirement of the Baştent University policy of steady improvement, academic programs of its departments are updated according to the criteria of the national and international accreditation boards. Besides basic sciences, general engineering, and profession-specific courses, social sciences, and fine arts courses are also offered in every engineering program, each semester.

Theoretical engineering courses are supported with applications and experiments, which are interactively carried out in small-groups in modern laboratories, under the supervision of experienced teaching staff. Teaching staff of the Faculty carry out both theoretical and research projects with national and international institutions, in particular cooperation with the Scientific and Technological Research Council of Turkey (TÜBİTAK) and the Turkish Ministry of Industry, and they pay due importance to university-industry relations. This experience and the know-how pool are shared with our students in the educational activities in order to prepare them to real-life problems.

The entire staff of our Faculty pays utmost care to student advisory and strives for supporting education and social life of every student. ‘English
Preparatory’ principle of the Başkent University applies to all programs of the Faculty in the undergraduate curricula. Each student graduates with sufficient knowledge of English in his/her field of profession. In order to relate theory with practice our students have to fulfill two summer internships for 40 workdays after the 4th and 6th semesters. In their senior year, every student in their 7th and 8th semesters carries out a senior graduation project under the supervision of a dedicated faculty staff. Our students during the course of their projects perform their research particularly through a concerted full
FACULTY OF ENGINEERING

exposure to the industry-university collaboration, usually on a leading-edge technology platform and knowledge base, which gets them prepared to the real work environment. Some of the senior graduation projects are realized with international collaboration among universities and are supported through grants from TÜBİTAK. Completed projects are presented to the industry at an exhibition at the end of semester. Bağkent University has launched another primordial, namely to financially support senior graduate projects at national and international meetings. In the past, participating student groups have won first and second places, success awards and represented our university and country successfully.

Our students can benefit from the Erasmus program, which enables the exchange of students and academic staff among the universities of European Union member countries, during regular or summer semesters, and they can gain foreign experience during their university education.

In addition, Master of Science Programs in Computer Engineering, Biomedical Engineering, Electrical and Electronics Engineering, Industrial Engineering, Quality Engineering, Mechanical Engineering, Energy Engineering, and Doctorate Program in Electric-Electronics Engineering are carried out by the Graduate School of Natural and Applied Sciences of Bağkent University for a graduate degree.

Engineering Faculty of Bağkent University continues to educate its students to serve important roles in the development of our country as engineers who generate rather than transferring technology, has over 1500 graduates who have established their own businesses as entrepreneurs and are highly recognized in public and private sectors.

The Faculty of Health Sciences was established in the academic year of 1999-2000 with the aim of equipping graduates with hands-on experience of their jobs as well as helping them gain the skills of lifelong learning, research, teamwork and leadership, all of which are regarded as the indispensable part of a successful career in the field of healthcare. Taking the vision of “quality and teamwork in healthcare”, of Prof. Dr. Mehmet Haberal, the founder of Başkent University, into account, the Faculty integrates the Department of Nutrition and Dietetics, Department of Physical Therapy and Rehabilitation, Department of Nursing and Health Services, Department of Healthcare Management, Department of Sport Sciences and Department of Social Work under a core curriculum. This authentic academic structure, pioneered by Prof. Dr. Mehmet Haberal, has been pursued by other universities in subsequent years and thus faculties of health sciences have begun to be launched by various universities in Turkey.
The mission of the Faculty of Health Sciences is to educate students so as to help them become competent, well-educated, modern, and creative individuals and scientists who show respect for a code of ethics, human rights, being equipped with the skills of lifelong learning, and effective communication in both their professional and academic career. The programs in the Faculty of Health Sciences are designed to prepare graduates to build a professional career in line with the demands of the 21st century. The Faculty of Health Sciences, with qualified academic staff in their fields, offers student-centered education, and also contributes to the scientific development in our country by original health science researches.

The Faculty of Health Sciences has taken a key leadership role in publications as well as in the field of scientific research.

We welcome the opportunity to offer education to those seeking to pursue a career in health sciences.

FACULTY OF MEDICINE
In response to Turkey’s need for high quality institutions of higher education, The Organ Transplant and Burns Treatment Foundation which has been in operation since 1980, made the decision to turn its existing complexes into a university. In 1993, procedures were begun to establish Baskent University, with the aid of the Haberal Education Foundation. The University was officially founded by the founder and the president, Professor Mehmet Haberal on January 13, 1994. Başkent University Faculty of Medicine was established at the same year. Although the postgraduate program was started in 1994, the undergraduate training was established in the academic year of 1998-1999. At Baskent University Faculty of Medicine the number of full-time academic staff continuously increased to provide a higher quality education to students in small groups.

The language of education in our Faculty is Turkish. However, medical English education is a mandatory part of the curriculum.

High technology of medical equipment, significant contributions to research, and dynamic academic staff have made this Faculty a successful higher medical institution.

Our Mission is;

To raise pioneer physicians who are devoted to improving human health and open to continuous progress, who are rational and creative in thinking, good in communication, who have a high level of and up to date clinical proficiency, fulfilling universal scientific specifications, devoted to principals of medical ethics, prioritising the values of humanity within the origins of universal needs and ethical values,

To provide a high quality and unique health service without any time limitation with the support of our multi-institutional structure, scientific researches and modern administrative approach and

To raise the level of health status and consciousness to a higher quality.

Our Vision is;

To become a leading medical faculty which is respected for its self-developed values, and a center of attraction with its medical education, research and health service.

Education, training, research and health activities are carried out at the Bağlıca Campus and at the University’s Practice and Research Centers and hospitals in Ankara and five different locations (İstanbul, Adana, İzmir, Konya and Alanya) in the country.

The faculty is composed of three sections as Basic Medical Sciences; Surgical Sciences; and Medical Sciences. Each section is made up of departments and divisions, as listed below. Junior staff is not included below.

The goal of the Faculty of Commercial Sciences, Baskent University, is to raise creative and solution oriented individuals with entrepreneurial spirit who can comprehend practices, necessities, and novelties in the targeted economic sectors. Educational programs or the departments in the Faculty of Commercial Sciences are all 4 year undergraduate programs.

The academic content of the programs is prepared according to the expectations of the targeted economic sectors. The educational programs of the departments of Banking, Accounting and Financial Management, Insurance and Risk Management, International Trade, and Management and Information Systems are conducted in close co-operation and co-ordination by all the departments. Having completed successfully a common program module for two academic years, all students follow their own core program modules. Meanwhile, the students in the Department of Tourism and Hotel Management also take some essential courses from the common module which is spread over the academic years.
All educational programs are also supported by the summer internship and on-the-job training programs which are compulsory and carried out by the co-operation of both the university and related economic sectors. Learning foreign languages and using computers as well as computer based instructional technologies, which have important roles in raising the personnel of the information age, are the core components of all programs.

The instruction in the Faculty of Commercial Sciences is in Turkish. However, every student has to be able to follow any course module that is thought in English as well as to use instructional sources in English if necessary. Therefore, students are required to pass an English proficiency exam. Otherwise they have to complete a one year English preparatory program. Additionally, in order to use English effectively in their professional life, students are required to pass the compulsory English Language courses that take place in the four-year educational programs.

VOCATIONAL SCHOOL OF HEALTH SCIENCES
The objective of Başkent University, Vocational School of Health Sciences is to educate and train qualified healthcare technicians in order to meet the demands of rapidly changing healthcare sector.

The vocational school offers nine different programs: Operating Room Services, Anesthesia, Dialysis, Physiotherapy, First Aid and Emergency Care, Pathology Laboratory Techniques, Medical Documentation and Secretarial Skills, Medical Imaging Techniques, Elderly Care. Based on modern approaches and up-to-date information, our programs are run by experienced Inst.s in their fields. The common medical, behavior sciences and social sciences classes are offered along with program-specific lessons for each department. Before the clinical practice, our students have the opportunity to conduct experiments and carry out...
hands-on-lessons on dummies and simulators in well-equipped modern laboratories. The major practical trainings take place in the medical centers of Başkent University under the supervision of their Inst.s, taking students’ individual preferences into account.

Our students are prepared to the demands and requirements of the medical sectors for which they will work through 30-day-long-training during the summer break of the first year and also via weekly practical 32-hour-long-trainings during the fourth academic term.

Students can also be transferred to relevant four-year BA programs in comply with the regulations.

In order to spread the community oriented facilities in all over the country our founding President Prof. Dr. Mehmet Haberal established, Adana Vocational School of Health Sciences. Our Vocational School had its first graduates by the support of its service quality, value added students and the effort given to education have assertive and successful graduates.

The vocational school offers four different programs: First Aid and Emergency Care Program, Anesthesia Program, Physiotherapy Program, Radiology Program (Medical Imaging Techniques program)

Based on modern approaches and up-to-date information, our programs are run at three different Başkent University and at Adana Practice and Research Center Policlinic. The aim of the Adana Vocational School of Health Sciences is to train specialists equipped with the knowledge, skills, and attitude necessary to give comprehensive health to meet social health requirements.

Our students are prepared to the demands and requirements of the medical sectors for which they will work through 30-day-long-training during the summer break of the first year and also via weekly practical 32-hour-long-trainings during the fourth academic term.

Students can also be transferred to relevant four-year BA programs in comply with the regulations.

A country’s economic, social and cultural development depends on its work force which is directed and grown in accordance with the requirements of the service.

The lack of trained personnel the in the field of health, in our country, is growing and the importance of vocational education, is increasing and intermediate manpower is needed. To train educated and trained man power in our school is a very important service for our country.

The most important source is manpower, and the most important investment is education. With this awareness in our country, the international harmonization in the field of health, the industry’s expectations while maintaining standards of professional competence and national guards, in the field of knowledge, skills, the ability to practice, use of initiative, authority and responsibilities, knowledge, which can create a solution, working successfully in teams are all important elements. Students graduating from our school after a two-year technician training can find jobs both in public and private sectors in health without difficulty.

The aim of the Vocational School of Social Sciences is to train professional business people who can meet the needs of the business sector.

The School offers two-year associate degree programs. Scholarships are granted on the basis of the Student Selection Examination grades and scholastic performance.

Common features of the curriculum, besides the programs equipping the students for their specialization areas, are summer programs linked with on-the-job training, second language education commensurate with the requirements of students’ future professions.

All programs are designed to allow students to proceed to a bachelor’s degree. Vocational School of Social Sciences is a member of Leonardo da Vinci Program via Başkent University’s Erasmus Charter. Vocational programs in “Tourism and Hotel Services” and “Office Management and Executive Assistance Program” have been offered since 1995; “Tourism and Traveling Services Program”, “Accounting and Taxation Program”, “Radio and Television Programming Program” and “Photography and Videography Programs” have been offered since 2008. The school has a dynamic staff, small classes, well-equipped laboratories, a practice restaurant and two training hotels.

İki yıllık eğitimimizin ilk yılında temel teknik konular okutulurken, ikinci yıl derslerinde, tümüyle ilgili programların uzmanlık konuları işlenmektedir. Birçok ders uygulamalı olup, uygulamanın yapıldığı laboratuvarlar öğrencilere mezuniyet sonrası iş ortamlarında karşılaşıacakları pratik problemlere çözüm getirmede ihtiyaç duyacakları deneysel bilgi ve beceri birikimini kazanabilmeleri için gereken modern makine ve teçhizat ile donatılmıştır.

Yüksekokulumuz, eğitim programlarını, iş alanlarındaki beklentilere cevap verebilecek biçimde ve dünyadaki değişimler ışığında sürekli geliştirecek, ülkemizin sanayi, endüstri ve hizmet sektörlerinde ihtiyaç duyduğu, konularında uzman teknik ara eleman ihtiyacı olanın karşılanmasına katkı sağlamaktadır. Programlardan mezun olanlara “Ön Lisans” diploması verilir.

When Başkent University was established, our founding president Prof. Mehmet Haberal defined one of its missions as “The medium of instruction of the university is Turkish but English is a compulsory component of education for all.”

In line with this mission, Vocational School of Foreign Languages aims to ensure that graduates of all academic and vocational programs of Başkent University are equipped with English language skills which will enable them to follow the literature in their fields of study and communicate effectively both in written and spoken English.

One of the main aims of Başkent University is to educate a generation of dynamic and successful researchers and business people who can communicate with the outside world. In order to achieve this, the university has made English a compulsory language to learn for Vocational School of Foreign Languages offers both Intensive English Programs and English for Specific Purposes (ESP) courses applicable to each academic or vocational program.

Newly arriving students are required to take a Proficiency Test at the beginning of the academic year. According to their exam results, students are either placed in a year of Intensive English program (Preparatory class) or permitted to pass directly into their freshman year where they take an ESP course.

Departmental English Courses offered are all compulsory credit-courses. They are designed specifically to meet the language needs of each department, thus the focus is on English for Specific Purposes (ESP) and English for Academic Purposes (EAP) with a high degree of input in General English.

Prof. Himmet Umunç
Director
International Relations Coordination Office

The International Relations Coordination Office is in charge of the development and implementation of European and trans-national university agreements and projects and has been continuing its work since its establishment in 2003.

With the completion of one of the European Education and Youth Programs, Socrates in 2007, a new phase has been launched under the name Lifelong Learning Programme (LLP). LLP enables people at all stages of their lives to take part in stimulating learning experiences, as well as helping to develop the education and training sector across Europe. Başkent University is among the higher education institutions which have been awarded the Extended Erasmus University Charter by the European Commission to participate in LLP in the period 2007-2013. As a EUC holder, Başkent University is able to offer its students the opportunity to spend one or two semesters in Europe studying or participating in an internship programme. Within the framework of Erasmus Programme, Başkent University has signed a total of 115 agreements with 23 EU countries in 38 different areas.

Academic Assessment Coordination Office

The Academic Assessment Coordination Office works in coordination with the “Commission of Academic Evaluation and Quality Development”, which was formed in accordance with the Turkish Higher Education Regulations. The mission of the office is to form the basis for the accreditation processes of criteria used in universal higher education systems and to ensure the continuity of quality processes of the university which are being carried out since its foundation.

The duties of the Academic Assessment Coordination Office are

- To submit an annual Academic Evaluation and Quality Development report to Higher Education Council (YÖK).
- To prepare a detailed report, comparing the current performance criterion with the previous year, and to distribute it to all academic units of the university.
• To carry out annual work on performance evaluation and internal evaluation as outlined in the report.

• To prepare and follow the strategic planning of the university.

• To give support to the Commission in the process of defining the internal-external strategies and the aims and objectives of the university.

• To determine the effectiveness of reaching the goals set by individual units and giving guidance and support when needed.

• To carry out a detailed study on the University Entrance Exam Results and to analyze the exam results in relation to the programs and departments of the university.

• To carry out a detailed analysis of KPSS (The Selection Examination for Professional Posts in Public Organizations) results in relation to Higher Education Programs.

• To carry out work within the framework of Bologna Process and to work in coordination with Başkent University Bologna Coordination Commission (BEK).

• To ensure that the ECTS credits of the vocational, undergraduate and graduate programs are kept up-to-date.

• To keep record of all scientific/academic activities of the university and to give guidance to academic units in planning, coordinating and implementing their research activities as well as guiding them with measurement-evaluation-feedback processes.

• To ensure that all project, research and thesis proposals submitted to Humanities and Social Sciences Committee and to Arts Research Committee are checked thoroughly and to write their reports.

• To carry out statistical work on Başkent University student enrollments.
Arrival of Atatürk in Ankara and Ankara Seymenler
27 Aralık 2010
The main aim of the center which was formed in 1997 is to assist students in making well-informed decisions in planning their future carriers and to help them find jobs most suitable for their qualifications. The center provides the following services:

- Organizing a series of Career Days where students and their prospective employers meet. These meetings provide the opportunity for students to learn about different companies operating in specific sectors and for companies to give information about them and to hand out job application forms.

- Establishing links between graduates and the companies seeking employees.

- Helping graduates who are planning a change of job find a new one by providing them with a list of options.

- Conducting one-to-one meetings with students in order to help them pursue a career path most suitable for their individual skills and interests.

- Conducting seminars and individual meetings to equip students with important skills such as resume writing and interview techniques.

- Researching job options for graduates.

- Informing students who want to pursue an academic career about graduate programs within Turkey and abroad and help them in the application process.

The center is open between 09:00 – 17:00 on weekdays and provides service to Başkent University students free of charge.

Başkent University graduates are given the priority to apply and work in Başkent University affiliates such as Patalya hotels, Başkent hospitals around Turkey.
Center For Language Studies

The function of the center is to provide Turkish courses which are compulsory in all undergraduate and vocational programs of the university and to organize cultural activities, seminars to enhance the knowledge and appreciation of our mother tongue and culture. The center also offers elective language courses in German, Arabic, Persian, Spanish, Italian, Russian, French and Greek.

OFFICE OF HEALTH, CULTURE AND SPORTS

Health Services

The Health Center provides service to Başkent University students and personnel. There are 3 doctors, 1 dentist, 4 nurses, 2 emergency medical technicians, 2 secretaries, 1 driver working in the center. The center offers outpatient services and dental health and is open 24 hours a day, 7 days a week. There are also an emergency room and an ambulance service. Initial medical care and emergency services are free of charge.
Physically Disabled Students Unit

In accordance with “Higher Education Institutions Guidance and Coordination Regulations” item 8, Başkent University Physically Disabled Students Unit was formed in 2006. The unit operates under a vice president and is run by an administrative board consisting of the vice president, the director of health, culture and sports, two faculty members of the department of social service and the health services representative. The disabled students currently enrolled have been contacted and their needs have been defined. It has been confirmed that the buildings and the open areas within the campus accommodate their needs.

Psychological Counseling and Guidance Center

The purpose of Psychological Counseling and Guidance Center which was formed in 1997 is to help students mobilize their resources to solve their personal, social and academic problems and to help them grow emotionally, intellectually and socially. In order to achieve its aim, the center provides individual or group counseling. The center also offers seminars on communication skills, anger management, stress management, efficient studying skills, time management, test anxiety, communicating with the opposite sex, adolescent problems and depression. Students who participate in these work groups are given a “certificate of attendance.” All activities are free of charge and adhere to the principle of confidentiality. The center is open between 09:00-17:00 on weekdays and operates on an appointment system by a group of specialists under the management of a coordinator.

Student Dormitories

Built in 1996, our dormitories aim to provide our students with accommodation, nutrition, opportunity to study in a healthy, safe and clean environment and to support them to adapt to the conditions of communal living and thus to contribute to their success.

Our University Dormitory which consists of 3 interconnected residence halls has 474 bed capacity with its standard double and single rooms as well as exclusive single and double rooms. The standard rooms are furnished with carpets while the exclusive rooms have wooden floorboard. All rooms have a bathroom with washbasin, toilet and 24-hour hot water.

There is a bed, wardrobe, bookcase, desk and chair to study in the standard rooms. The exclusive rooms additionally have a TV set, an armchair and a mini fridge. Each building has telephones on every floor that can be reached when there is an external call announcement.
Dormitories
Dormitory buildings and rooms are cleaned daily. Bedsheets which are provided by the dorm administration are changed once every two weeks. All rooms have limitless wi-fi connection. Male and female dormitory staff and security personnel work in 24-hour shifts. There is a Study Hall which is 24-hour available. Dormitories are located on campus, and transportation to city center is provided free of charge by the university shuttle buses. The latest entry times to the dorms are 12 a.m. on weekdays and 1.30 a.m. on Friday, Saturday and official holidays respectively. Within the dormitory complex, a table d’hôte for choice dining, an ATM, a TV lounge, card phones, a market, a billiards room, an a la carte café, a barber and a hairdresser, a chess hall (under the supervision of a chess instructor), an internet café, a laundry room (with sufficient number of washing machines, dryers and irons) are available. Again, in the dormitory area, there are a Sports Center and other facilities available for students’ use. On Campus, there is a post office, a bank office and a variety of dining locations for students to eat and refresh.

**Social and Cultural Services**

The main aim of the unit is to offer students the opportunity for personal growth in social and cultural aspects that will inevitably help them increase their academic performance. The unit aims to provide a variety of extracurricular activities and encourage student involvement. There are 69 student groups, out of which, 28 are for vocational and 41 are for social purposes.
Food Facilities

Başkent University Bağlıca Campus has a variety of catering facilities offering food at competitive prices. In the English Preparatory School building, there is a fast-food cafeteria with a capacity of 500, a market and a photocopy center. In the Faculty of Medicine building, there is a restaurant with a capacity of 200 and a cafeteria. The Faculty restaurant with a capacity of 300, the student restaurant-café with a capacity of 700, a market, and a photocopy center are all located in the Faculty of Law building. In the dormitory complex, there is a Billiard café with a capacity of 400, a TV lounge with a capacity of 100, a restaurant with a capacity of 150, and a market. In the student clubhouse, there is a fast-food cafeteria and a pita parlor. In the main building (Rector’s office), there is a fast-food cafeteria and market and a personnel restaurant with a capacity of 600. In the Faculty of Dentistry building, there is a market and an internet café. In Channel B building, there is a fast-food and pastry cafeteria and a market.

Transportation

Transportation is free of charge for Başkent personnel and students. There are buses running between the city center and Bağlıca Campus regularly.

BAŞKENT UNIVERSITY CAMPUSES

City Campus

The city campus is located around Bahçelievler, Emek and Maltepe. The area around Başkent University Ankara Hospital is where the outpatient clinics, the physical therapy center, the Faculty of Dentistry units, the first aid training center, the administrative offices and family planning research center are located.

Bağlıca Campus

The campus, located 20.km west of the city center, on the main highway to Eskişehir, is built on 650 acres of land. Vocational, undergraduate and some graduate programs are run on the premises of Bağlıca Campus. To meet the expanding needs of the University, construction has continued throughout the years since the admission of the first students. The annual construction program is done by taking into account the programs and student quotas. Apart from the buildings which house administrative offices, faculties, schools and vocational schools, there are dormitories and social facilities for students, an amphitheatre, a sports center, indoor and outdoor tennis courts, football and athletics fields, food facilities, technical support units.
Başkent University Alumni Association (BAŞMED)

BAŞMED is established to unite the alumni of Başkent University under one roof, to organize social activities and to generate projects which our graduates would benefit from, and to strengthen the bond among the alumni by effective communication and support. BAŞMED has also taken the responsibility of maintaining the link between the university and its alumni and to give support to graduates in their career paths and their social and cultural lives.

Library

Başkent University Library is an important center for education and research which provides necessary information and sources for its users.

The library space consists of 3 different rooms: the Serials Room, the Reading Room, and the Reference Room. The library can handle approximately 367 people at the same time.

The library network works on Bliss-Unix Automation System which can serve 30 user at the same time. The automation system holds a database of all the library material. Users may search the material by entering keywords and then reach the material of their choice. (Classified by subject)

Also the circulation process is realized by computer system. The system produces automatic reports for late turn-arounds.

The library uses the Library of Congress Classification System except for books on medicine which are classified by the National Library of Medicine’s Classification System. For the cataloguing process, the library uses Anglo American Cataloguing Rules 2.
The aim of Başkent University Sports Center Coordination Office is to enable our students and personnel to maintain and improve their physical health, gain regular and disciplined sports habits and become actively involved in with the kinds of sports activities they enjoy.

In order to achieve its aim, the sports center organizes a variety of activities and tournaments in volleyball, basketball, table tennis, football, tennis, chess, and fitness. The center also runs courses on step, aerobics, Pilates, tennis, boxing, wing t-sun, and yoga.

Our university sports teams (volleyball, basketball, football, soccer, table tennis, billiard, tennis, chess, swim, etc.) participate in a variety of tournaments organized by the Turkish University Sports Federation (TÜSF) and successfully represent Başkent University.

The sports facilities on campus include volleyball, basketball, handball courts, an outdoor field for soccer and American football, a gym, a fitness center, a dance studio, and an indoor and outdoor tennis court that are open on weekdays and weekends. The location of the campus is suitable for outdoor activities such as, walking, jogging, and training in natural surroundings.
