Founder**

Message from Başkent University Founder

Başkent University is a pioneering university that adopts a fundamental principle of educating individuals to embrace the enlightenment of science and mind, actualizing critical, analytical, and creative thinking in every area of life, having national consciousness, being a researcher, producer, respectful to people, nature, and universal values, and faithful to Atatürk's Principles and the Republic; and increasing the cultural level of our country by the activities of education-training, research-development and science production-dissemination and contributing at the highest level to enhance human health, protect the nature and meet the needs of the society.

Since its establishment in 1993 at Başkent University, where a great many firsts were accomplished, quality and ongoing enhancement have been seen as a chief purpose, and in line with this purpose, it has achieved to become an innovative university that foresees, takes precautions, acts solution, and action-oriented, makes a quick decision and puts them into practice, and enlightens the future.

At Başkent University, we will continue to produce with the principle of "7 days 24 hours" to be successful in national and international platforms by raising the quality standards in all areas of service, especially on health and education, and work in the interests of our country and all humanity.

**Prof. Dr.
Hakan ÖZKARDEŞ**

Başkent University President

Message from the President of Başkent University

Başkent University started its journey mainly in the field of health. The first faculty established was the Faculty of Medicine. After that, both academic staff and educational facilities continued to develop rapidly, and every start was realized within the principles of total quality management. In the following pages, you will see in detail, the numbers of Başkent University's faculties, institutes, vocational schools, application and research centers and educational institutions that are spread all over the country. Today, we have an excellent campus that has transformed from a barren land into an area with countless trees, plants and greenery planted around the buildings with a great environmental awareness. It is difficult to find an example of this dynamic structuring not only in our country but also in the world.

Başkent University is a globally recognized higher education institution with its external stakeholders both inside and outside the country. The international accreditations of our faculties reinforce this fact. This feature is an important factor for our students and graduates to find different opportunities abroad. Significant efforts are made to maintain connections with our students after graduation. A Başkent University diploma is a gateway to production, life and the world. For this reason, we have no doubt that our graduates will always feel that the institution they grew up in is always behind them. We will see their success as long as we live, and we will feel it even if we don't see it.

BAŞKENT UNIVERSITY PRIVATE AYŞEABLA SCHOOLS

Ayşeabla Kindergarten and Primary Schools were established in 1946 in Ankara and have kept their existence for a long time by the Secondary and High School sections, which opened gradually from the 1985-1986 academic year. In 1999, it was incorporated into Başkent University by Prof. Dr. Mehmet Haberal, who attaches importance to Primary Education as well.

By the slogan of Prof. Dr. Mehmet Haberal, the founder of Başkent University, "Not to concrete, not to starve" which emphasizes the importance of preserving nature, PER Food, Agriculture, and Livestock, was deployed on 72 decares of land in Ankara Kızılcahamam district in 2008, aiming to contribute to the sustainable development in the fields of food and agriculture.

Our farm supplies the meat requirements for Patalya Hotels and some of the milk requirements for Aşkar Dairy Products.

Per Food, Agriculture and Livestock

The Agricultural production and animal husbandry activities are being undertaken particularly at Başkent University Bağlıca Campus and also Kahramankazan, Kızılcahamam, Haymana, and Kalecik districts. Vegetable, fruit, and grain production activities as well as chicken and quail egg productions are actualized in greenhouses and open fields.

Daily chicken and quail eggs are generated on our farm, which has a capacity of at least 1000 animals, including bovine and ovine. In addition, vegetable and fruit production has started, and the demands of our staff and people that fruit from their branches and vegetables from their soil are met.
