

## Statement of The Transplantation Society's support to the people of Syria and Turkey.

As the global leader in transplantation, committed to health and life for all, The Transplantation Society expresses grave concern over the humanitarian crisis in Syria and Turkey.

The protection of civilians and preservation of healthcare is imperative. TTS stands ready to support our colleagues, friends, families and patients impacted by this tragedy. We will be collaborating with Baskent University to provide our expert assistance on the emergency.

We are collecting funds on behalf of victims which will be distributed to support the maintenance of healthcare and assist transplant patients as may be possible. TTS will match each contribution, dollar for dollar, up to \$50,000 USD.
